
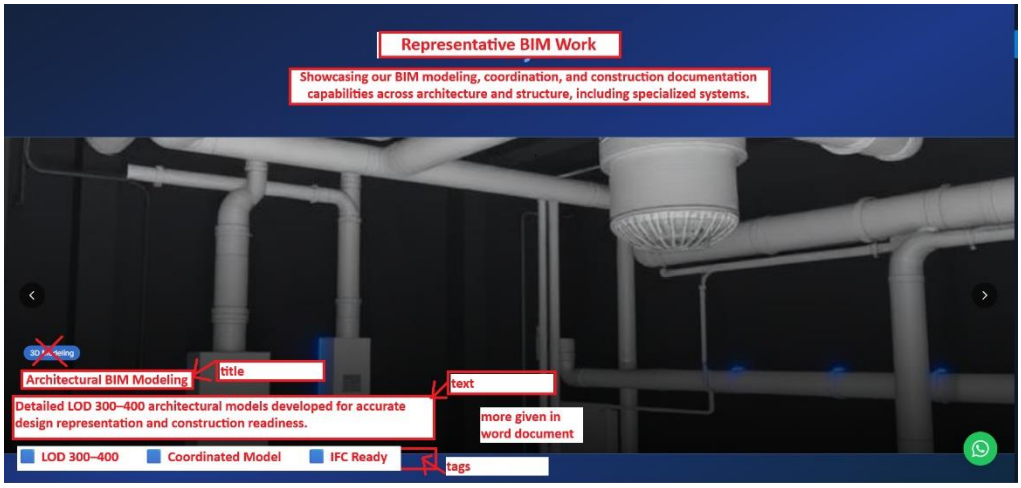
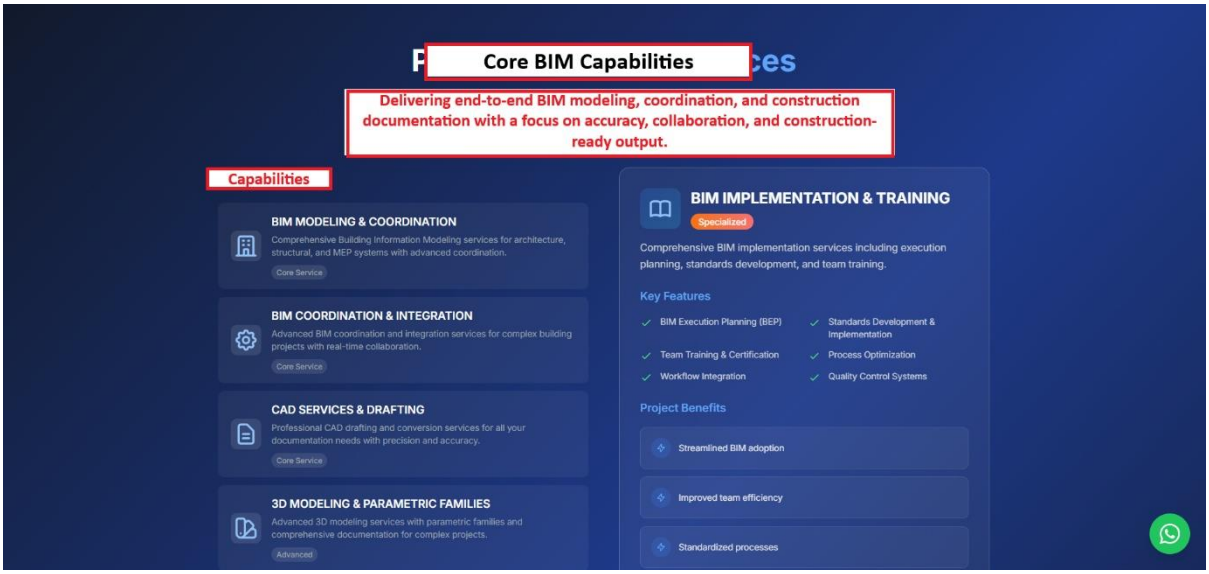
- MAIN HEADLINE (Big & Bold)
- Construction-Ready BIM Modeling & Coordination
- SUBTEXT
- Delivering LOD 100–500 BIM models with full coordination, clash resolution, and IFC documentation. Supporting contractors and consultants with accurate, build-ready models across architecture and structure.
- TRUST LINE (Small, subtle)
- Architecture | Structure | Coordination | Scan-to-BIM | Food Service Expertise
- BUTTONS
- Primary:
- Request a Proposal →
- Secondary:
- View Our Work
- POWER LINE
- Place below buttons and subtle fade animation:
- We don't just model — we deliver coordinated, construction-ready BIM.
- Baground image keep rotating
- Scale from 1.0 → 1.05 slowly (10–15 sec loop)
- Slight mouse movement → background shifts subtly
- NAVBAR
- Replace with:
- Home | Services | Workflow | Projects | About | Contact
- WHATSAPP TOOLTIP
- Add:
- "Chat with us"
- Button spacing:
- Keep gap between 2 buttons
- Hover effect:
- Slight glow or color change
- Headline width:
- Not full width → keep it centered & premium



- TITLE
- Representative BIM Work
- SUBTEXT
- Showcasing our BIM modeling, coordination, and construction documentation capabilities across architecture and structure, including specialized systems.
- Sliding tittle text and tags
-
- 1.Title:
- Architectural BIM Modeling
- Text:
- Detailed LOD 300–400 architectural models developed for accurate design representation and construction readiness.
- Tags: □ LOD 300–400 □ Coordinated Model □ IFC Ready
- 2.Title:
- Structural BIM Modeling
- Text:
- Precise modeling of beams, columns, and structural systems aligned with construction requirements.
- Tags: [LOD 300–400] [Structural Systems] [Construction Ready]
- 3.Title:
- BIM Coordination & Clash Resolution
- Text:
- Multi-discipline coordination ensuring clash-free, construction-ready models through issue identification and resolution.
- Tags: [Clash Detection] [Issue Resolution] [Coordinated Model]
- 4.Title:
- IFC Drawings & Documentation
- Text:
- Extraction of accurate construction drawings including plans, sections, and elevations directly from coordinated BIM models.
- Tags: [IFC Drawings] [Shop Drawings] [Sheet Production]
- 5.Title:
- Scan to BIM
- Text:
- Conversion of point cloud data into precise BIM models for renovation and as-built documentation.
- Tags: [Point Cloud] [As-Built Model] [High Accuracy]
- 6.Title:
- Food Service BIM
- Text:
- Specialized BIM modeling for commercial kitchens including equipment layout and coordination.
- Tags: [Equipment Layout] [Fabrication Ready] [Coordination]
- Dark gradient overlay behind tittle and text (left side only) tags should be like small pills with baground colour Add small icon/dot before text
- □ Add padding below
- □ Keep breathing space
- REMOVE THIS LABEL:
- “3D Modeling”
- Slight zoom-in on image when active
- Smooth fade transition (not harsh slide)
- Pause on hover
- Below button “View Detailed Work →” Leads to Projects section



LEFT SIDE (SERVICE LIST)
Use exactly this (keep short):

1. 1. BIM Modeling (Architecture & Structure)
2. LOD 100–500 model development aligned with design intent and construction requirements.
3. ---
4. ◈ 2. BIM Coordination & Clash Resolution
5. Multi-discipline coordination with clash detection and issue resolution for build-ready models.
6. ---
7. ◈ 3. Construction Documentation (IFC Drawings)
8. Extraction of accurate IFC drawings directly from coordinated BIM models.
9. ---
10. ◈ 4. Scan to BIM
11. Conversion of point cloud data into precise as-built BIM models.
12. ---
13. ◈ 5. Food Service BIM
14. Specialized BIM modeling for commercial kitchens and food service facilities.
15. ---
16. ◈ 6. BIM Implementation Support
17. Setup of BIM standards, workflows, and execution strategies for projects.
18.

□ Highlight item (blue glow or border)
□ Slight scale or background change

RIGHT PANEL CONTENT (FOR EACH SERVICE)

◈ 1. BIM Modeling (Architecture & Structure)
Title:
BIM Modeling (Architecture & Structure)
Description:
Development of accurate BIM models from concept to detailed levels (LOD 100–500), ensuring alignment with design intent and construction requirements.
Key Capabilities:

- Architectural BIM Modeling
- Structural BIM Modeling
- LOD 100–500 Development
- Parametric & Data-Rich Models
  What You Get:
- Accurate and scalable BIM models

- Design-aligned model development
- Structured data for project use
- Ready base for coordination

Tools:
Revit | AutoCAD

◈ 2. BIM Coordination & Clash Resolution ☆

Title:
BIM Coordination & Clash Resolution
Description:
Multi-discipline coordination with clash detection and resolution through continuous collaboration with project stakeholders.
Key Capabilities:

- Clash Detection (Hard & Soft)
- Issue Tracking & Resolution
- Multi-Discipline Coordination
- Coordination Meetings Support

What You Get:

- Coordinated, clash-free models
- Reduced site conflicts
- Faster approvals
- Smooth project execution

Tools:
Navisworks | Revit

◈ 3. Construction Documentation (IFC Drawings)

Title:
Construction Documentation (IFC Drawings)
Description:
Extraction of accurate construction drawings directly from coordinated BIM models, ensuring consistency and reliability.
Key Capabilities:

- GA Drawings
- Sections & Elevations
- Shop Drawings
- Sheet Setup & Standards

What You Get:

- IFC-ready drawing sets
- Consistent documentation
- Reduced manual drafting errors
- Faster project delivery

Tools:
Revit | AutoCAD

◈ 4. Scan to BIM

Title:
Scan to BIM
Description:
Conversion of point cloud data into accurate BIM models for renovation, retrofit, and as-built documentation.
Key Capabilities:

- Point Cloud Processing
- As-Built Modeling
- Model Alignment & Accuracy
- Existing Conditions Modeling

What You Get:

- Accurate as-built models
- Reliable renovation data
- Reduced site verification effort

- Improved planning accuracy
  Tools:
  Recap | Cyclone | Revit

◈ 5. Food Service BIM
Title:
Food Service BIM
Description:
Specialized BIM modeling for commercial kitchens including equipment layouts, coordination, and fabrication-ready detailing.
Key Capabilities:

- Equipment Layout Planning
- Mep rough in sheets
- Coordination with Services
- Fabrication-Level Detailing
- Vendor Coordination Support .
- Experience supporting international food service consultants and contractors.
  What You Get:
- Optimized kitchen layouts
- Efficient equipment coordination
- Reduced installation issues
- Fabrication-ready outputs
  Tools:
  Revit

◈ 6. BIM Implementation Support
Title:
BIM Implementation Support
Description:
Support for BIM standards, workflows, and execution strategies tailored to project and organizational requirements.
Key Capabilities:

- BIM Execution Planning
- Template & Standards Setup
- Workflow Optimization
- Team Support & Guidance
  What You Get:
- Structured BIM workflows
- Improved team efficiency
- Standardized deliverables
- Scalable BIM processes
  Tools:
  Revit | Navisworks | ACC/BIM 360

HEADING
Project Experience Across Global AEC & Food Service Projects

SUBTEXT
Due to confidentiality and NDA requirements, detailed project information is not publicly displayed. We have supported multiple projects across architecture, structure, and food service BIM workflows.

FINAL PROJECT HIGHLIGHTS

1. Commercial & Residential Developments
BIM modeling and coordination for multi-storey buildings and residential projects.

◈ 2. Hospitality & Hotel Projects
Coordinated BIM support for hotels, resorts, and hospitality facilities.

◈ 3. Food Service & Commercial Kitchen Facilities ☆

Specialized BIM for kitchen layouts, equipment coordination, and installation-ready outputs.

◇ 4. Renovation & Retrofit Projects
BIM support for existing structures including upgrades and modification works.

◇ 5. As-Built & Scan to BIM Projects
Conversion of point cloud data into accurate as-built BIM models for existing conditions.

◇ 6. BIM Coordination & Clash Resolution Projects
Multi-discipline coordination with clash detection and issue resolution workflows.

◇ 7. Construction Documentation (IFC) Projects
Generation of IFC drawings and detailed documentation from coordinated BIM models.

◇ 8. Industrial & Complex Structures (OPTIONAL)
BIM support for complex structural systems and large-scale construction projects.

Projects workflow section consistant

HEADING
Have a Project That Needs Coordinated BIM Delivery?
SUBTEXT
Let’s support your project with construction-ready BIM modeling, coordination, and IFC documentation aligned with your workflow and timelines. Flexible support based on your project scope, timeline, and BIM requirements.

SECTION NAME Our BIM Delivery Workflow

SUBTEXT

A structured approach to BIM modeling, coordination, and construction-ready delivery, aligned with real project workflows across AEC and food service projects.

1. Project Input & Design Review
We begin by reviewing design intent, consultant drawings, and project requirements to establish a clear BIM execution approach.

◇ 2. BIM Model Development
Development of architectural, structural, and food service BIM models aligned with design inputs and required LOD levels.

◇ 3. Multi-Discipline Coordination
Integration of all disciplines into a coordinated BIM environment, ensuring alignment across architecture, structure, and specialized systems.

◇ 4. Clash Detection & Issue Identification
Identification of clashes and coordination issues using BIM tools to prevent conflicts during construction.

◇ 5. Issue Resolution & Model Updates
Collaboration with stakeholders to resolve issues and continuously update the BIM model to maintain accuracy.

◈ 6. Model Finalization (Coordinated BIM)
Finalization of a fully coordinated, construction-ready BIM model ready for documentation and execution.

◈ 7. IFC Drawings & Deliverables
Extraction of construction documentation including plans, sections, elevations, MEP rough-in reference drawings, isometric views, and shop drawings directly from the coordinated BIM model to support installation and coordination.

8. Construction-Ready Delivery
Delivery of a fully coordinated BIM model along with IFC drawings and supporting documentation.

Add a testimonial here no heading just a readable section
Layout:

- Center aligned
- Medium width (not full width)

Style:

- Italic text
- Slightly larger font
- Soft card OR no card (both okay)
- Subtle quote icon (optional)

Attribution:

- Smaller font
- Slightly lighter color
- Place just below quote

Add a subtle fade-in animation on scroll

“A great resource for production drawing and BIM support. Highly responsive, aligned well with our team’s standards, and consistently delivered on time. I would definitely recommend their services.”
— FCSI Consultant, Principal & Creative Director

- Input → document icon
- Modeling → 3D cube
- Coordination → network/connection
- Clash → warning icon
- Resolution → tools
- Final → checkmark
- IFC → drawing sheet

☐ Slight animation on scroll (step appears one by one)
☐ Highlight active step on hover
☐ Clean connecting line between steps

OWER LINE
We don’t just create models — we deliver coordinated, construction-ready BIM aligned with real project workflows.

☐ Revit

- ☐ Navisworks
- ☐ AutoCAD
- ☐ ACC / BIM 360
- ☐ Recap
- ☐ TruView
- ☐ Cyclone

HEADING
Levels of Development (LOD)

💬 SUBTEXT
We deliver BIM models from concept to construction-ready and as-built levels, aligned with project requirements and coordination needs.

LOD CARDS (FINAL)

◈ LOD 100 — Conceptual Design
Basic massing and geometry for early-stage planning and feasibility.

◈ LOD 200 — Schematic Design
Generalized elements with approximate quantities for design development.

◈ LOD 300 — Detailed Design
Accurate geometry and quantities suitable for coordination and documentation.

◈ LOD 350 — Coordination Level
Detailed elements with interfaces to support multi-discipline coordination.

◈ LOD 400 — Fabrication Ready
Highly detailed elements ready for fabrication, installation, and execution.

◈ LOD 500 — As-Built Model ☆
Verified as-built BIM models based on site data and scan-to-BIM workflows.

About Us

💬 SUBTEXT (REPLACE COMPLETELY)
Delivering coordinated, construction-ready BIM solutions across architecture, structure, and specialized food service projects.

TITLE
Who We Are

◈ CONTENT (UPDATED – COPY THIS)
Innovative BIM Services focuses on delivering high-quality BIM modeling and coordination aligned with real construction workflows.
With experience across architecture, structure, scan-to-BIM (as-built), and food service projects, we support contractors and consultants in developing accurate, coordinated models ready for execution.

TITLE
Why Work With Us

◈ BULLETS (FINAL)

- Construction-ready BIM delivery approach
- Strong coordination and issue resolution focus
- Experience across AEC and food service projects
- Flexible and scalable project support
- HEADING
- Our Approach
-
- ◈ CONTENT
- We focus on delivering BIM that works on site — not just on screen.

- From model development to coordination and IFC delivery, our approach is built around reducing site issues, improving collaboration, and ensuring smooth project execution.
